

Prokashev Vadim Sergeevich

Full-stack Developer

33 years old

Languages: Russian (native), English (B1)

Citizenship: Russia

Telegram, WhatsApp: +7 (705) 888 48 50

GitHub: <https://github.com/vprokashev>

Email: prokashevvs@gmail.com

Full-stack developer with 9 years of experience in web development, specializing in JavaScript, TypeScript, and React.js. Proficient in building scalable, user-friendly web applications with attention to accessibility (a11y). Experienced in solving complex technical challenges in both enterprise-level and smaller-scale projects.

What positions am I looking for?

Due to my relocation to Serbia, I am currently considering only remote positions. However, if your company is based in Serbia, I would be happy to come to the office.

Key Skills

Languages: JavaScript, TypeScript, CSS, SCSS, C#, SQL (MSSQL, PostgreSQL)

Frameworks & Libraries: React.js, Angular (1.5), jQuery, Next JS, Nest JS, Express JS, Prisma, tRPC, Zod, Sequelize, Bootstrap, Emotion JS, Material-UI, Stage UI, React testing library with Jest, Cypress, Telegraf.js

Tools: Webpack, Vite, ESBuild, Docker, Kubernetes, Jenkins, Drone, Git, Jira, Confluence

Professional Experience:

Team lead

GP Tunnel | November 2024 – April 2025

A startup providing access to popular neural networks with pay-as-you-go pricing

- Conducted planning and retrospectives
- Review code quality
- Interviewed candidates
- Assisted with documentation for a patent application
- Set up a Telegram bot for a promotional campaign
- Wrote manifests for Kubernetes (K8s)
- Added a new "Panorama" tool for image upscaling
- Optimized various parts of the application

Technologies: React.js, TypeScript, Stage UI, tRPC, GraphQL, Prisma, TypeORM, Express JS, PostgreSQL, K8s, Yandex Cloud

Key Developer

EPAM (Out staff for EBSCO) | May 2022 - May 2024

Project: EBS-NOV

Maintained a newsletter management system that allowed users to create emails and publish them on social media.

- The project used multiple build tools — Gulp and Webpack. I migrated the project entirely to Webpack, reducing build time by splitting it into multiple configs and parallelizing builds in Jenkins to improve development efficiency.
- Added a web interface for searching media assets within the system.
- Developed an extension for the Stripo plugin to integrate a media resource collection into the email builder.
- Migrated legacy parts of the project from jQuery and Backbone to React.js and Material UI.
- Wrote tests using Jest and conducted code reviews. Since there was no QA on the team, I also handled testing tasks.
- Participated in regular meetings to define backlog task requirements.

Technologies: React.js, TypeScript, Material-UI, .NET 4, MSSQL, SCSS, Stripo, Webpack, Gulp, Jest, Jenkins, SonarQube

Senior Frontend Developer

I-Teco, (Out staff for Sberbank) | September 2019 - April 2022

Project: Sberbank Online

Implemented a new service in Sberbank Online – “Transaction Verification with Assistant”

- Developed a micro-frontend application using React.js and integrated it into the Sberbank Online ecosystem.

- Built a landing page for the service using the Nova Design System
- Created step-by-step form components for submitting applications
- Designed 4 document templates using JasperReports
- Prepared user support documentation in MS Word
- Regularly participated in acceptance testing

Technologies: React.js, TypeScript, Emotion JS, PostgreSQL, Webpack, Jest, Cypress, Figma, Jenkins, SonarQube

Frontend Developer

Perfect Art | November 2018 - September 2019

Project: TME

- Developed a web application for DB Schenker that visualizes forecast analytics with charts and generates CSV reports.

Technologies: React.js, TypeScript, ECharts, PostgreSQL, SCSS, Webpack

Frontend Developer

Magora Systems | November 2014 - July 2018

This company gave me my start in the industry, and I had the opportunity to work on a wide variety of projects. Here are a few that stood out to me:

Showapp

A mobile app that allows users to discover events in their city, register for ones they like, invite friends, check in, and upload photo and video reports.

- Built the admin panel using React.js

Mixaline

A web portal designed to organize and view events on a timeline, enriched with content like maps, images, quotes, films, links, and books.

- Developed the web frontend using React.js
- Implemented WebSocket-based synchronization to prevent concurrent edits of the same event by multiple users

Technologies: React.js, Redux, Angular (1.5), AdminLTE, Bootstrap, jQuery, StrongLoop, Node JS, WebSocket, Stylus, SASS, Webpack, Gulp, C#, MS SQL, Docker, Jenkins, Photoshop, PixelPerfect plugin
